UJWALDEV V M

CLOUD DEVOPS ENGINEER

Remote — India | +91 9363256736 | vmujwaldev@gmail.com
LinkedIn: https://www.linkedin.com/in/ujwaldev-v-m-638501406
GitHub: https://github.com/ujwaldev100-debug

PROFESSIONAL SUMMARY:

Cloud DevOps Engineer with 5+ years of IT experience, including 4+ years in **DevOps and cloud technologies**. Skilled in **CI/CD pipeline implementation, cloud infrastructure management, automation,** and **containerization**. Experienced in working with **AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, Linux,** and **Python**, with a strong focus on improving **deployment efficiency, scalability,** and **system reliability**. Skilled in building **automation scripts, developing web applications,** and **integrating Python solutions** to **enhance DevOps workflows**.

CAREER SUMMARY:

- Experienced in **AWS** and **Azure cloud infrastructure design**, **deployment**, and **management**.
- Skilled in **CI/CD automation using Jenkins**, **Azure DevOps**, **GitHub Actions**, and **GitLab CI**.
- Proficient in Infrastructure as Code using **Terraform**, **AWS CloudFormation**, and **ARM templates.**
- Hands-on experience with **Docker**, **Kubernetes**, **Amazon EKS**, **AKS**, and **microservices deployments.**
- Strong knowledge of **Linux administration**, **Python**, **Bash**, **Shell scripting**, and **Git**.
- Experienced in **AWS and Azure services**, **cloud networking**, **monitoring**, and **security best practices.**
- Skilled in application **monitoring** and **troubleshooting** using **CloudWatch, Azure Monitor, Prometheus, Grafana, and ELK Stack.**
- Application development experience using **Visual Studio Code (VS Code), Python 3.12, Django, HTML, CSS, JavaScript, JSON and SQLite**.

TECHNICAL SKILLS:

- Cloud: **Microsoft Azure, AWS, GCP**
- CI/CD: **Azure DevOps, Jenkins, GitHub Actions, GitLab CI, AWS Code Pipeline**
- Containers: **Docker, Kubernetes, AKS, EKS, ECS, Helm, Argo CD**
- Infrastructure as Code: **Terraform, CloudFormation, ARM templates**
- Automation: **Ansible, Python, Bash, Shell, PowerShell**
- Version Control: **Git, GitHub, GitLab, Bitbucket**

- Monitoring: **Azure Monitor, Log Analytics, CloudWatch, Prometheus, Grafana, ELK Stack**
- Build and Quality: **SonarQube, Nexus, Visual studio code**
- Networking and Security: **VPC, subnets, DNS, load balancing, security groups, IAM**
- Other Tools: **Jira, Docker Hub, Service now, VS Code,**

PROFESSIONAL EXPERIENCE:

MRF Pvt Ltd | August 2021 – July 2026

Movate Technologies | July 2026 – Present

PROJECT EXPERIENCE:

1. Manufacturing Platform — Azure DevOps

- Provisioned Azure infrastructure using **Terraform** and **ARM templates** for multi-environment deployments.
- Built **Azure DevOps CI/CD pipelines**, reducing manual effort by **70%**.
- Deployed **Docker**-based microservices on **AKS** and standardized releases with **Helm**.
- Implemented **GitOps** workflows using **Azure DevOps Repos** and **Argo CD**.
- Managed **Azure VMs**, **VNets**, **Load Balancer**, **Blob Storage**, **DNS**, and **access controls**.
- Integrated **Azure Monitor**, **Log Analytics**, **Prometheus**, and **Grafana**, reducing incident response time by **40%**.
- Automated operations with **Python**, **Shell**, **PowerShell**, and **Ansible**; applied **RBAC**, **Managed Identities**, **NSGs**, and **container security**.

2. Automotive Application Platform — AWS

- Automated build, test, and deployment workflows using **Jenkins** and **GitHub/GitFlow.**
- Optimized **Docker** images with multi-stage builds and managed images in **Amazon ECR**.
- Provisioned **VPC**, **ECS**, **networking**, and **IAM resources** using **Terraform**.
- Deployed containerized applications on **Amazon ECS** and **integrated SonarQube** for code quality.
- Built serverless integrations using **AWS Lambda** and **API Gateway**.
- Managed artifacts with **Nexus** and monitoring with **CloudWatch**, **Prometheus**, and **Grafana**.
- Automated operational tasks using **Python** and **Shell**; applied least-privilege **IAM** and secure container practices.

3. Cloud Transformation Program — AWS

- Designed **AWS** infrastructure using **VPC**, **EC2**, **RDS**, and **S3**; reduced environment setup time by **60%** through **Terraform** automation.
- Configured **public/private subnets**, **security groups**, and **Network ACLs**.
- Built **Docker** images and deployed workloads on **Amazon EKS**.
- Implemented **GitOps** with **Argo CD** and **CI/CD** using **Jenkins** and **AWS Code Pipeline**.
- Developed event-driven integrations using **AWS Lambda**.
- Configured monitoring with **CloudWatch**, **Prometheus**, and **Grafana**.
- Applied **IAM**, **KMS**, and Secrets Manager controls and supported resilience through **Multi-AZ deployments**, **AWS Backup**, **S3 versioning**, and **cross-region replication**.

PERSONAL PROJECT:

Ellora — Creative and Visual Discovery Platform

Created and deployed **Ellora**, a personal website and application focused on creative and visual discovery, demonstrating initiative in digital product development and deployment.

EDUCATION:

BCA — Cloud & DevOps
Jain University | 2026 – Present

Diploma — Mechanical Engineering
Government Polytechnic College, Palakkad | 2017 – 2020

CERTIFICATIONS:

- **Building a Cloud Architecture Diagram** — LinkedIn Learning, August 2026
- **Cloud Architecture: Design Decisions** — LinkedIn Learning, August 2026

Regards, **UJWALDEV V M**
